DETAILED ACTION

1. A review of the claims and search necessitated the rejections below.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to drawn to a variable life insurance product for capitalizing on an arbitrage opportunity between annuity markets and life insurance markets, classified in class 705, subclass 4.
- II. Claims 18-32, drawn to a method for forming an arbitrage entity; obtaining a loan from a lender; purchasing a annuity and life insurance product; ad sale of ownership interest in the arbitrage entity.

1. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h).

Art Unit: 3609

The examiner has required restriction between product and process of use, due to claims 1-17 are drawn to a product with certain features and claims 18-32 are drawn to a method with steps that do not mirror the product claims. Claims 1-17 are classified under 705/4 while claims 18-32 are classified under.

Conclusion

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
